THERE WERE 1,200,000,000 OVERSEAS TRIPS TAKEN IN 2015

YOUR FRIENDS ARE TRAVELLING ALL AROUND THE WORLD

EVER WONDER WHERE & WHAT THEY ARE UP TO ABROAD?

Current social media platforms are insufficient to give users the full picture...
- OVERLOAD OF IRRELEVANT CONTENT
- NO COHERENT STORY OF FRIEND'S TRIP
- HARD TO TRACK MULTIPLE BLOGS

See all of your friends journeys in one platform

Journey automatically pulls data from your facebook posts into a trip, easily viewed by friends...
My trip to Rome

**Listed below are some of the main functionalities of Journey:**
See most recent journeys

Search by friends

Explore each journey

Customize your own journeys

## We have also put in some pretty cool animations for users...

Animations   Explanation

### Translucent black overlay on hover   *<journey-anim1.gif>*

This indicates that the journey card is clickable, and that the user can view journeys by clicking on the overlay. We chose to use this instead of placing a button, so as not to clutter up the ui.

Ink ripple effect upon checking a checkbox   *<journey-anim2.gif>*

This provides feedback to the user and lets them know their action had an effect.

Calendar slide in on datepicker click   *<journey-anim3.gif>*

Instead of letting the datepicker modal appear suddenly, the modal slides out smoothly. The calendar then slides in to indicate to the user that it is scrollable.

Not to mention, putting a lot of thought into making it load fast...

> **"** AJAX is used abundantly throughout our application. In our AngularJS controllers, most of the important scope variables are defined within some asynchronous function. We made sure that our async calls smoothened the user experience by *promise-chaining* -- lighter calls were chained before more intensive ones so that at least some of data (e.g. profile picture, name) could be requested, loaded and displayed to the user before others (e.g. array of journeys). **"**

Journey has so much potential...

Find nearby friends   **Discover new places**   **Greater social integration**
